

**SPECIALTIES AND EXPERTISE:**

- Underground and Surface Metalliferous Mining Technical Due Diligence
- Underground and Open Pit Planning, Copper and Gold Operations
- Feasibility Preparation and Review, Copper and Gold Operations
- Capital and Operating Cost Estimation and Review
- Technical Expert Reviews of Mining Operations
- Project Valuations and Financial Modeling
- Operational Management
- Acquisition/Divestitures, Strategic Planning

**Mr Peter Ingham** (B.Sc. (Mining), M.Sc., DIC, Grad. Dip. App. Finance (Securities Institute), CEng, FAusIMM, MIMMM)) is General Manager Mining for BDA and is a graduate mining engineer with more than 30 years in the mining industry in Europe, Africa, Australia and Asia. His experience includes operations management, mining contract management, strategic planning, project assessment and acquisition, cost estimation and operational audits and trouble-shooting. He is experienced in a range of commodities, including copper, nickel, base metals, gold and platinum, in both surface and underground mining.

Mr. Ingham's specific project experience includes:

- Conducting due diligence examinations, mining reviews, and site visits on base and precious metals properties for Behre Dolbear Australia in Australia, Africa, China and Southeast Asia. Projects have included reserve audits and operations reviews for Australian mining companies.
- Conducting independent technical reports for Chinese mining companies seeking to list on the Hong Kong Stock Exchange, including Zhaojin Mining Co Ltd.
- Carrying out feasibility study within China in partnership with Chinese Design Institute.
- Preparations of pre-feasibility and feasibility studies with particular experience in copper and gold mining.
